

**Mappt**<sup>™</sup>  
Mapping Better

## ENVIRONMENTAL

Plan your projects on time and on budget with our efficient, affordable GIS

### GEOTAGGED PHOTOS

Pin photos onto your map to flag hazards and highlight details for rapid assessment

### DROP DOWN FORMS

Create forms listing the attributes you want to record to reduce repetitive typing and errors

### OFFLINE GPS TRACKING

Calculate and record distances to keep track of the ground you have covered

### GEOFENCING

Keep your team away from hazardous areas with alerting geofences

### THEMATIC MAPPING

Assign attributes to layers and create a colour coded map to segregate information

### IMPORTING & EXPORTING

Once back online, simply send data via email, Google Drive and other cloud based storage

With Mappt<sup>™</sup> there is no vendor lock in, so it works with all major GIS applications

## TESTIMONIAL

*"This is the only useful mobile GIS app for Android tablet that I know of. It has KML and SHP capability, with import and export functions, plus live or imported imagery. It is all logically organised and easy to use, and the technical support has been excellent."*

*Derek Johnson  
QTree Vegetation Assessment*
